2018  
VALUE REPORT

# POPULATION HEALTH: A SUCCESS STORY

## INCREASING EARLY DETECTION OF COLORECTAL CANCER

GRIPA identified and contacted **more than 12,300 additional adults** in the last two years who were at risk of going without cancer screening (commercial- 90th percentile nationally). This represents approximately 290 colorectal cancer deaths avoided due to screenings.

## MANAGING HIGH BLOOD PRESSURE

Nearly 70% of patients with hypertension have controlled blood pressure. Controlling blood pressure **reduces risk of stroke by 34%** and heart disease by 21%.

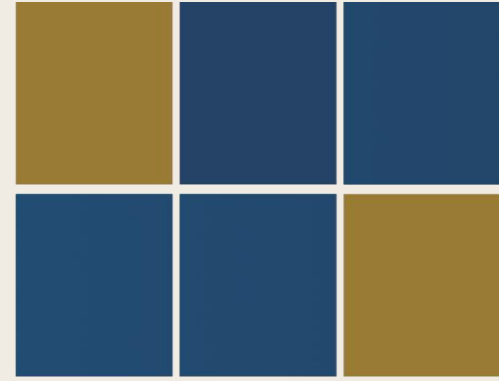

## BREAST CANCER SCREENING

Nearly **84%** of patients received breast cancer **screenings** (commercial- 90th percentile nationally).

Compliance with screening guidelines can play an important role in prolonging longevity, improving quality of life and reducing health care costs through early detection of breast cancer.

**GRIPA** providers participate in multiple payer population health agreements across all lines of business and have achieved exceptional quality performance each year. By using GRIPA's population health tools, our physicians have implemented best practices in preventive medicine and care management. Their work is saving and changing lives. The more than 300,000 patients under the care of this innovative program are getting healthier and staying healthier.

## DIABETES

GRIPA physicians consistently score among the best in the nation in providing all diabetes standards of care including eye exams, attention to nephropathy, HbA1c testing and control. This care **significantly reduces the risk of:**

- Heart attack
- Stroke
- Amputation
- Kidney failure
- Diabetes-related mortality
- Diabetes-related eye problems

## IMPROVING WELL CHILD VISITS AND IMMUNIZATION RATES

Over 87% of children and adolescents with a GRIPA physician received their recommended annual well visits and immunizations (commercial – 90<sup>th</sup> percentile nationally).
